AI-3004 - Build an Azure AI Vision solution with Azure AI Services

Microsoft - Microsoft Azure - Artificial Intelligence

Durata:	Lingue:	Certificazione:
1 Giorno	**Italiano**	**-**

Descrizione del corso

In this course, you will learn how to implement computer vision solutions by using Microsoft Azure AI Vision. Specifically, you'll learn how to:
• Design a solution that analyzes images using prebuilt features.
• Create a custom vision model for classification and object detection.
• Perform optical character recognition (OCR) and extract insights from video.

Audience Profile

The primary audience for this course is application developers seeking to computer vision features in their applications. Students should have experience programming in either Python or C#, be familiar with the Azure portal, and be comfortable provisioning Azure AI resources.

Programma

- Introduction
- Analyze and manipulate images
- OCR
- Detecting Faces with the Azure AI Vision
- Custom vision models with Azure AI Vision
- Analyzing Videos
