

AI-3018 - Copilot Foundations

Microsoft - Microsoft Copilot - Artificial Intelligence

Durata:	Lingue:	Certificazione:
1 Giorno	Italiano	-

Descrizione del corso

Copilots are quickly becoming a popular way to use with AI models, automate tasks, and improve productivity. In this learning path, you'll explore options for adopting, using, and creating copilots. This course will be retired on April 2025 and replaced by MS-4014: Build a foundation to extend Microsoft 365 Copilot **PREREQUISITES:**

Familiarity with Azure and the Azure portal. COURSE CONTENT:

- Fundamentals of Generative Al
- Get started with Microsoft Copilot Studio
- Introduction to Azure Al Studio
- Build a RAG-based copilot solution with your own data using Azure AI Studio

Programma

Module 1

Fundamentals of Generative AI

• In this module, you explore the way in which language models enable Al applications and services to generate original content based on natural language input. You also learn how generative AI enables the creation of copilots that can assist humans in creative tasks.

Module 2

ITCore Group

Via Balestra, 12 6900 Lugano (CH) +41.091.9760019 www.itcoregroup.com Via Lanino, 36 21047 Saronno (VA) +39.02.84108669 www.itcoregroup.com

Get started with Microsoft Copilot Studio

• Microsoft Copilot Studio allows organizations to quickly create agents based on business scenarios their customers and employees can easily interact with as needed. In this module, you're introduced to key concepts for agents.

Module 3

Introduction to Azure AI Studio

• Microsoft Azure offers multiple services that enable developers to build amazing AI-powered solutions. Azure AI Studio brings these services together in a single unified experience for AI development on the Azure cloud platform.

Module 4

Build a RAG-based copilot solution with your own data using Azure AI Studio

 Copilots can work alongside you to provide suggestions, generate content, or help you make decisions. Copilots use language models as a form of generative artificial intelligence (AI) and will answer your questions using the data they were trained on. To ensure a copilot retrieves information from a specific source, you can add your own data when building a copilot with the Azure AI Studio.
