IT-DEVASC - Developing Applications and Automating Workflows using Cisco Core Platforms

Cisco - CCNA DevNet - Networking

Durata:	Lingue:	Certificazione:
5 Giorni	**Italiano**	**Cisco Certified DevNet Associate**

Descrizione del corso

The Developing Applications and Automating Workflows using Cisco Core Platforms (DEVASC) course is designed to help you prepare for the Cisco DevNet Associate certification and for associate-level network automation engineer roles. the focus of this course is implementation of basic network applications using Cisco platforms as a base, as well as implementing automation workflows across network, security, collaboration and computing infrastructure. the course provides hands-on experience solving real world problems using Cisco Application Programming Interfaces (APIs) and modern development tools. This course is designed for anyone who performs or seeks to perform a developer role and has one or more years of hands-on experience developing and maintaining applications that are built on top of Cisco platforms.
This course will help you:
• Take advantage of the network when you implement applications to fulfill business needs
• Gain a foundation in the essentials of applications, automation, and Cisco platforms
• Prepare for the 200-901 DEVASC exam, which earns Cisco Certified DevNet Associate certification
