

MS-4010 - Extend Microsoft 365 Copilot with declarative agents by using Visual Studio Code

Microsoft - Microsoft Copilot - Artificial Intelligence

Durata:

1 Giorno

Lingue:

Italiano

Certificazione:

-

Descrizione del corso

This training course is designed to help you understand the extensibility options available for Build connectors and plugins for Microsoft 365 Copilot. You learn about the different ways to extend Copilot, including building plugins and connectors, and how to choose the right option for your use case. The course also covers best practices for building high-quality plugins and connectors, as well as data, privacy, and security considerations. Whether you're a pro-code or low/no-code developer, this course helps you chart your path to extending and customizing Build connectors and plugins for Microsoft 365 Copilot.

Programma

- Introduction to declarative agents for Microsoft 365 Copilot
- Introduction to actions with API plugins for declarative agents
