

SC-401T00 - Information Security Administrator

Microsoft - Microsoft Security - Virtualizzazione e Cloud

Durata:

4 Giorni

Lingue:

Italiano

Certificazione:

**Microsoft Certified: Information
Protection and Compliance
Administrator Associate**

Descrizione del corso

The Information Security Administrator course equips you with the skills needed to plan and implement information security for sensitive data using Microsoft Purview and related services. The course covers essential topics such as information protection, data loss prevention (DLP), retention, and insider risk management. You learn how to protect data within Microsoft 365 collaboration environments from internal and external threats. Additionally, you learn how to manage security alerts and respond to incidents by investigating activities, responding to DLP alerts, and managing insider risk cases. You also learn how to protect data used by AI services within Microsoft environments and implement controls to safeguard content in these environments.

Programma

- Implement Information Protection
- Implement and manage data loss prevention
- Implement and manage Microsoft Purview Insider Risk Management
- Protect data in AI environments with Microsoft Purview
- Implement and manage retention and recovery in Microsoft Purview
- Audit and search activity in Microsoft Purview
