

PL-300T00 - Microsoft Power BI Data Analyst

Microsoft - Power Platform - Business Intelligence

Durata:

3 Giorni

Lingue:

Italiano

Certificazione:

Microsoft Certified: Power BI Data Analyst Associate

Descrizione del corso

This course covers the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI. The course will show how to access and process data from a range of data sources including both relational and non-relational sources. Finally, this course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution.

The audience for this course are data professionals and business intelligence professionals who want to learn how to accurately perform data analysis using Power BI. This course is also targeted toward those individuals who develop reports that visualize data from the data platform technologies that exist on both in the cloud and on-premises.

This course is part of "Microsoft Certified: Power BI Data Analyst Associate" Certification.

Prerequisites:

Successful Data Analysts start this role with experience of working with data in the cloud. Specifically:

- Understanding core data concepts.
- Knowledge of working with relational data in the cloud.
- Knowledge of working with non-relational data in the cloud.
- Knowledge of data analysis and visualization concepts.

Programma

1. Uso di variabili, mixins e nesting
