OCI_AUTW - Oracle Autonomous Database Workshop

Oracle - OCI - Virtualizzazione e Cloud

Durata:	Lingue:	Certificazione:
4 Giorni	**Italiano**	**-**

Descrizione del corso

This training teaches you how to provision an Oracle Autonomous Database Cloud Service instance on Oracle Cloud that is suitable for your workload and requirements. This is a great starting point for developers, administrators, architects

Programma

- Course Overview: Introduction
- Overview of Autonomous Databases
- Creating an Autonomous Database on Shared Exadata Infrastructure
- Managing Autonomous Database Using OCI Console
- Connecting to Autonomous Database
- Development and Administration Tools for Autonomous Database
- Data Loading
- Querying External Data with Autonomous Data Warehouse
- Moving Data from Autonomous Databases
- Backing Up and Restoring an Autonomous Database
- Cloning & Moving Autonomous Database to a Different Compartment
- Managing and Monitoring Performance
- Maintenance Activities for Autonomous Databases on Shared Exadata Infrastructure
- Autonomous Database with Private Endpoint on Shared Exadata Infrastructure
- Sending Mail with Email Delivery on Autonomous Database
