PAN-EDU-290 - Palo Alto Networks® - Traps: Cloud Service Operations

Palo Alto Networks® - Firewall - Cyber Security

Durata:	Lingue:	Certificazione:
2 Giorni	**Italiano**	**-**

Descrizione del corso

Students should learn how Traps protects against exploits and malware-driven attacks. In hands-on lab exercises, students will explore and configure new cloud-based Traps Management Service and install Traps endpoint components; build policy rules and profiles; enable and disable process protections; and integrate Traps with Palo Alto Networks WildFire® cloud service, which provides prevention and detection of zero-day malware.
