

PAN-EDU-281 - Palo Alto Networks® - Traps: Install configure and manage

Palo Alto Networks® - Firewall - Cyber Security

Durata:

2 Giorni

Lingue:

Italiano

Certificazione:

-

Descrizione del corso

Students should learn how Traps protects against exploits and malware-driven attacks. In hands-on lab exercises, students will install and configure the Endpoint Security Manager (ESM) and Traps endpoint components; build rules; enable and disable process protections; and integrate Traps with Palo Alto Networks WildFire, which provides prevention and detection of zero-day malware.
