IT-SWSA - Securing the Web with Cisco Web Security Appliance

Cisco - CCNP Security - Networking

Durata: Lingue: Certificazione:

2 Giorni Italiano Cisco Certified Network Professional

Security

Descrizione del corso

The Securing the Web with Cisco Web Security Appliance (SWSA) v3.0 course shows you how to implement, use, and maintain Cisco® Web Security Appliance (WSA), powered by Cisco Talos, to provide advanced protection for business email and control against web security threats. Through a combination of expert instruction and hands-on practice, you'll learn how to deploy proxy services, use authentication, implement policies to control HTTPS traffic and access, implement use control settings and policies, use the solution's anti-malware features, implement data security and data loss prevention, perform administration of Cisco WSA solution, and more.

Programma

- Describing Cisco WSA
- Deploying Proxy Services
- Utilizing Authentication
