DM-TER - Thermoregulation (heating/cooling)

ITCore Domotica - Domotica per Installatori e Progettisti - Domotica

Durata:	Lingue:	Certificazione:
1 Giorno	**Italiano**	**-**

Descrizione del corso

The course focuses on the automation structure of domestic thermoregulation systems.

Programma

• General features
• Control devices and actuators
• Configuration
• Installation requirements
• Wiring schemes
– 2 areas home with radiant panels and radiators
– 4 areas home with radiant panels, radiators and fan coils
– 6 or more areas home with radiant panels, radiators, thermo-furniture and fan coils
– Fan coil usage with and without 0-10 V solenoid valves
– Solutions with VRV Daikin systems
– Solutions with Rehau control units for radiant panels
• Smart thermostats
• Solutions with NETATMO radio valves
• NETATMO Weather Station
