Descrizione del corso

Veeam Data Platform (VDP): Scale, Automate, Secure training is a comprehensive course designed to equip IT professionals with the skills to **configure, manage, and support a Veeam Recovery Orchestrator (VRO) solution.**
The course can be taken as a standalone option or as part of a comprehensive program that consists of three training sessions required for the **Veeam Certified Engineer Security Expert (VMCSE) certification.**
This course simplifies the complexities of implementing robust, automated recovery plans.
Participants will learn how to leverage VRO to automate and streamline tasks, efficiently managing and orchestrating actions within their Veeam Backup & Replication environment.
Featuring extensive online lectures, interactive labs, and knowledge checks, this course builds the confidence needed to tackle common scenarios with a well-crafted, documented, and automated recovery plan. Enrolling in this course is your first step toward optimizing an effective data protection strategy that will deliver real value to your organization.

Prerequisites:
Veeam Data Platform: Scale, Automate, Secure is built on top of Veeam Backup & Replication:
Configure, Manage and Recover and Veeam Data Platform Monitor, Manage, Analyze — Veeam ONE trainings. Students should have high-level of understanding of both of those environment solutions.

Certification:
VDP Scale, Automate, Secure course is the third in a three-part series that makes up the VMCSE Completion of
• VDP: Enterprise data security
• VDP: Scale, Automate, Secure
• VDP: Monitor, Manage, Analyze
satisfies the prerequisite for taking the Veeam Certified Security Expert (VMCSE) exam.
VMCE certificate holders only will be eligible for taking the VMCSE exam and certification.
Students who complete the VDP: Scale, Automate,
Secure course by itself will receive a shareable badge after completion.
