Descrizione del corso

Veeam Data Platform (VDP): Monitor, Manage, Analyze training course is a comprehensive program designed to provide IT professionals with the essential skills to effectively deploy, configure, and leverage Veeam ONE within their environments.
This course demystifies monitoring and reporting complexities and enables administrators to maximize the visibility and performance of their virtual and backup infrastructures. Participants will gain practical knowledge on how to use Veeam ONE to proactively identify and resolve issues, optimize resource utilization, and generate insightful reports that foster informed decision-making. Through detailed online lectures, interactive labs, and targeted assessments, learners will build expertise and confidence in how to navigate common monitoring and reporting scenarios. Enrolling in this course is your first step toward mastering the tools necessary to enhance operational efficiency and strengthen your organization's overall data protection strategy.

Prerequisites:
Students should have fundamental IT experience working with networking, servers, storage, cloud, virtualization, and operating systems. It is recommended that students hold the VMCE certification. as well as familiarity with the core concepts of Veeam Backup & Replication through hands on experience including a minimum of six (6) months of commercial experience with Veeam prior to taking this course. Training is open to anyone interested, and a badge will be issued upon successful completion. However, only VMCE certificate holders will be eligible for taking the VMCSE exam and certification.

Certification:
Veeam Data Platform (VDP): Monitor, Manage, Analyze course is the third in a three-part series that makes up the VMCSE.Completion of:
• VDP: Enterprise data security
• VDP: Scale, Automate, Secure
• VDP: Monitor, Manage, Analyze
satisfies the prerequisite for taking the VeeamCertified Security Expert (VMCSE) exam.
VMCE certificate holders only will be eligible for taking the VMCSE exam and certification Students who complete the Veeam Data Platform (VDP): Monitor, Manage, Analyze course by itself will receive a shareable badge after completion.

Programma

Veeam ONE — Overview and Installation

Get started with Veeam ONE by understanding its core capabilities for data protection, monitoring, and reporting. Learn step-by-step how to successfully install and prepare your environment for optimal use.

Veeam ONE — Configuration and Monitoring

Build your skills in configuring Veeam ONE effectively and master the essentials of proactive monitoring to ensure your IT environment stays healthy and efficient.
