Cisco - CCNA Cyber Ops - Networking

Durata:

**5 Days**

Lingue:

**Italiano**

Certificazione:

**Cisco Certified CyberOps Associate**

### Course description

The Understanding Cisco Cybersecurity Fundamentals (SECFND) course gives you foundation-level knowledge of common security concepts, basic security techniques, and the fundamentals of applications, operating systems, and networking used in a Security Operations Center (SOC). This course helps you learn to find threats within a real-life network infrastructure using a variety of popular security tools. Through expert instruction and hands-on experience using enterprise-grade security tools, you will learn the basics of network and security concepts, endpoint attacks, cryptography, analysis, and monitoring. This course provides introductory knowledge for those interested in entering the field of cybersecurity and is the first of two courses that prepare you for the Cisco CCNA® Cyber Ops certification. This course helps you prepare to take the 210-250 SECFND exam, first of the two required exams to achieve the CCNA Cyber Ops certification. The 210-250 SECFND exam will be available on February 24, 2020.
